Mission

We deliver it at its best.

Since our founding, we at MTLs have been moving forward as experts in chilled and frozen food transportation with high aspirations in our hearts.

To make sure that “we deliver it at its best” to the table of our customers, we make every effort possible in all distribution processes including preservation, transportation and cargo handling.

Moreover, we will contribute to food culture not just through our long-standing experience but also through investments in new technologies and CSR initiatives.

Service

We deliver it at its best.

01

The largest food distribution infrastructure in the Tokyo area

02

50 years' worth of experience in the chilled & frozen food industry

03

The freshness preservation device that decreases food loss
“Next Generation Cold Chain”

04

Realizing a low cost operation
Our problem-solving capabilities

05

To overseas destinations with spectacular economic growth
We provide a one-stop development

Philosophy

We deliver it at its best.

1. Customer Happiness

We listen to the diverse needs of our customers and bring peace of mind and excitement to each product with sincerity.

2. Employee Happiness

We will work hard and grow in order to contribute to our customers, and as a result, pursue happiness both materially and spiritually.

3. Social Happiness

We contribute to the creation of a society full of smiles by building logistics lifelines with our abundant creativity and flexibility.

The mountain on the left represents the management philosophy of "happiness of society," the small mountain on the right is "happiness of customers," and the darkest blue overlaps with "happiness of employees," meaning that "happiness of employees" will not exist unless these overlaps are combined.

And in the "happiness of employees," the "Action Guidelines" mentioned earlier, Mission, Team, Law, and Speed are included, and by firmly adhering to them, this also becomes the "Action Guidelines" equal to "happiness of employees. Mission is the first word in the Action Guidelines, and it is our raison d'etre (reason for existence) and what we must fulfill. And the ● in the upper right corner represents the future, meaning that we will make great strides toward the future.

Global Branding

MTLS Group will expand its technology throughout Asia and around the world by utilizing the “cold chain” know-how developed in Japan

In the future, the MTLS Group network will accelerate its global expansion, aiming to contribute to freshness distribution and food loss on a global standard.

- Contracting of logistics operations, Proposal of bases
- Proposal of optimal distribution flow
- Proposals for expansion of distribution areas through freshness retention technology
- Proposals for domestic and international distribution (sales) of perishable products
- Proposals for human resource shortages & training

- Providing appropriate cost management, Efficient logistics environment
- Providing quality distribution with minimal loss
- Expansion of trade area, reduction of food loss
- Provision of sales outlets & distribution channels
- Proposal of staffing & Personnel exchange

MTLS Group's "Global Branding"

Case 1

Alliance with Korean logistics company

DENBA DISS KOREA, a joint venture with Sunjin, a major South Korean logistics company, was established to expand freshness logistics. The joint venture aims to expand freshness logistics between Japan and Korea, as well as to other countries starting from Japan and Korea.

Case 2

Entry into fruit & vegetable wholesale business

Capital alliance with Satoyu, a fruit wholesaler based in Singapore. Based in Singapore, a hub of Asia, the company is involved in fresh food distribution to neighboring countries.

Case 3

Human Resource Development of Logistics Experts in Vietnam

Global Human Resource Development will bring innovation through cultural exchange and a full-scale commitment to diversity.
